

White Book Reveals Grew Warned United States Mass Raid on Pearl Harbor By Japanese Imminent

By WADE WERNER

WASHINGTON, Jan. 4.—(AP)—A White Book issued by the United States state department Saturday night disclosed that Ambassador Joseph C. Grew cabled from Tokyo, Jan. 27, 1941, that the Japanese had plans for a "surprise mass attack at Pearl Harbor in case of trouble with the United States."

The Grew cable was one of a series of warnings dating back to 1923 and growing progressively urgent in the subsequent years until on Nov. 28, 1941, State Secretary Cordell Hull told the British ambassador, Viscount Halifax, that "the dramatic part of our relations with Japan was virtually over and that the matter will now go to the officials of the army and navy."

Moreover, the White Book reported Hull's mistake for our country and other countries interested in the Pacific situation to make plans of resistance without including the possibility that Japan might attack suddenly and with every possible element of surprise and spread out over considerable areas of the Pacific certain positions and posts before the successful invasion had been effected in the Pacific would have time to confer and formulate plans.

The references to the Grew cable and Hull's conversation with Halifax contained in the White Book entitled "Peace and War—United States Foreign Policy, 1941." A foreword to the document said:

WORLD DOMINATION
"The fatal decade, 1931-1941, began and ended with acts of violence by Japan. It was marked by the most successful development of a terminated policy of world domination on the part of Japan, Germany and Italy."

Accordingly, the book devotes much space to the rise of Italian and German aggression and the counter-measures adopted by the United States. It also discusses the report, Japan's troops move into Manchuria in the spring of 1931, and Hull's cable to Grew at Pearl Harbor on Dec. 7, 1941, warning of a surprise attack.

The attack launched by Japan on Manchuria Sept. 18, 1931, was the first step in the Japanese plan to dominate the Pacific, according to the White Book.

In February, 1932, says the White Book, "Secretary of State Stimson, then State Secretary of War, and Secretary of Navy, and Secretary of the Interior, advised the United States and British governments late in 1932 that the Japanese government was planning to invade the Philippines and the Kailash mountains, making clear that the two governments considered these as vital to the Pacific and that they would not recognize any violation of these treaties."

The British government did not accept the Japanese position, and the Japanese government was forced to withdraw its troops from the Kailash mountains. The Japanese government then turned to the United States, and the United States government was forced to accept the Japanese position.

On Dec. 21, 1941, Hull cabled from Tokyo, warning of the possibility of Japan's attack "with dramatic and tragic results. The Japanese cabinet that the public should be informed in public places of the Japanese attack on Pearl Harbor."

Three years later the United States launched a navy war against Japan in the Pacific waters. Japan apologized and American attention turned back to domestic affairs and the growing threat of a war in Europe. With the actual outbreak of war, and the subsequent catastrophic events of 1940, Europe dominated the foreign scene and the question of aid for Britain dominated affairs at home.

But in September, 1940, the threat of war with Japan again became a major factor in the foreign scene. When Tokyo signed the Tripartite Pact with Rome and Berlin aimed at the United States, the United States government was forced to take a stand.

The White Book records that three days after the signing of the Tripartite Pact, the United States government was forced to take a stand. The United States government was forced to take a stand.

Behind Britain
In the same interview Hull "emphasized to the United States the special desire of this government was to see Great Britain aided in the war. The United States government was forced to take a stand.

De Gaulle May Have Meeting With Giraud

By J. W. DICKINSON

Exclusive to The Edmonton Bulletin from the London Bulletin
LONDON, Jan. 4.—(AP)—Diplomatic quarters believed today that a meeting between Charles de Gaulle and Henri Giraud, high commissioner for French Africa and Fighting French leader, Gen. Charles de Gaulle, may be held in the near future.

However, a Fighting French spokesman denied reports that De Gaulle would meet Giraud. He said that Giraud had suggested a meeting on French soil.

"De Gaulle received a vague communication from Giraud Dec. 22," the spokesman said. "It mentioned a meeting, Giraud skated around the whole thing. He didn't say it was a meeting. He didn't say he didn't want to. He didn't say he didn't want to."

A Madrid dispatch from Algeria said Giraud was coming to meet with de Gaulle to meet with him, preferably in Algeria, and all heads of French military and civil administration in North and West Africa were being warned to be ready.

gentry, commanding the British Eighth Army, had been ordered to the Big push which he expects to take on Tripoli.

But the dispatches received by communiques of the Middle Eastern command had reported no substantial progress on the Libyan front for many days.

YANKS JOIN FIGHT
African dispatches said American planes and anti-air units had been ordered to the front. The French forces under Gen. Alphonse Juin who are holding 100 miles of the front south of Tunis, facing the east.

Join in a communique last night reported that German troops had made an attack in force, with many tanks, on his line southeast of Tunis, 50 miles south of Tunis, early yesterday.

The Germans succeeded in driving the French back from the first phase of their attack but the French counter-attack was successful. The Germans gave up and retreated toward their base of Kairouan, 100 miles south of Tunis.

Brig. Gen. Jacques Le Clerc's French motorized column advanced toward the German lines. The remote Italian French Air Force was reported pushing the Libyan desert toward Tripoli.

It is believed Mr. Haworth could be living alone, and was frozen when he was hit. He was hit by a bullet in the chest.

Two enemy destroyers were blasted by a series of torpedoes. The destroyers were hit by a series of torpedoes.

Callers From Shangri-la

United States bombers went back to Wake Island to commemorate the gallant defence made there a year ago by a party of 40 Marines against enemy forces ten times their number.

The raiders made the coconuts memorable. They showed the Japanese positions with 76,000 pounds of bombs, wrecked the installations, killed perhaps half the garrison, and got back to base without losing a plane or a man.

The bombers were of the heavy type, and they were made to appear as if they were in an operation in the Pacific. Planes of that kind cannot be launched from carriers. They take off and alight on land runways. While the base is located from which this flight took off for Wake Island is one of the things Tokyo would do doubt like to know.

Wherever it is, it is apparently within suitable range of the island, from which further and perhaps frequent visits may be anticipated.

Congratulations

The names of more than 400 Canadians appear in the New Year's list of those receiving honors from the King. All the awards are of a military nature. They were awarded the hard-earned honors by the king, and they were given to the king.

These honors are symbolic, as well as personal. Not all those who deserve recognition can be named. The king's list is a list of names, and it is a list of names that are symbolic of the king's list.

At the time of the decorations awarded to Canadians carried out in the name of the king, the king's list is a list of names that are symbolic of the king's list.

Congratulations to the recipients of these honors will be heart-felt and nationwide. The presentations confirm the confidence of Canadians in the king's list.

Utility Earnings
During the first eleven months of last year Edmonton's utility enterprises collected \$438,796 more revenue than in the corresponding period of 1941. This was due to the use of more light and water, and to the use of more street railway tickets bought.

The Edmonton city council has approved a resolution to increase the rate of the street railway fares. The council has also approved a resolution to increase the rate of the street railway fares.

Expenses went up \$269,384, but payments were nearly \$100,000. Capital charges were about \$7,000 less than 1941, but \$190,731 more was placed in the reserve fund to meet the cost of the new street railway.

The street railway naturally shows the largest direct result from wartime changes. The deficit of the system for the development period dropped to \$209,609, from the former figure of \$414,150. The betterment is quite sufficient to justify the action of council in refusing to raise the fare, as proposed earlier in the year.

The sufficient to give hope that in 1943 the street railway finances may get out of the red altogether.

Will The Trap Close?

While it may not happen, the swiftly moving events in that area support the views of some observers that the whole German line south and southwest of Stalingrad is liable to be broken.

It is not only the two-pronged drive of the Red Army toward the Caucasus is pushing German troops to the west, but also the fact that the German line is being pushed back by the Red Army.

Unless somewhere in the intervening 80 miles or so the Axis command has built defences out of comparison to those thus far encountered, the Russians may be in a position to break through the German line.

These are estimated to be a million strong, and to comprise one-third of the enemy troops in the Russian front. If the

threatened disaster is to be averted, this will have to be done by stopping the Russian drive before they reach the key city and close the gap. For there is now not time to evacuate the scattered spearhead divisions before an unanticipated advance would put the Red Army in Rostov.

In war nothing is certain but what has already happened is that the German line is not as strong as it once was. It is not as strong as it once was, and it is not as strong as it once was.

Getting Control
"Weather permitting" is a meaningful phrase in northern Canada, a byword for a permitted month in the way of ground fighting for two weeks, and only occasional bursts of aerial combat.

But Washington reports that the Allied air forces have had decidedly the better of such air fighting as the downpour allowed. They have shot down 300 enemy planes, while losing 121 of their own. These exchanges were more or less incidental to heavy bombing raids on Elzette, Tunis, and other Axis bases.

To win in North Africa it is necessary first to win control of the air. The daily reports show that this control has already passed from the Axis and is rapidly being gained by the Allies.

Marshall Petain is repudiated General Giraud. The General is to be congratulated. No higher honor could come to him in the circumstances of today than this repudiation of the name of France.

Not only Giraud, but also the name of France, is being repudiated. The name of France is being repudiated, and the name of France is being repudiated.

Saturday Night Radio Review

A Summary of a Broadcast
Delivered Over
CFRN January 2

By HAROLD L. WEIR
It becomes more and more apparent each week that Adolf Hitler is perched very uncomfortably on the horns of a dilemma—dilemma which will ultimately lead to his defeat.

Hitler's Nazi Germany has called most of the plays in the war game. We strike where he strikes, and we strike where he strikes, and we strike where he strikes.

Up until recent months, Hitler's method of operation was to use the "scorched earth" policy, and to use the "scorched earth" policy, and to use the "scorched earth" policy.

The result of all this is that Hitler finds himself in a high predicament. He is in a high predicament, and he is in a high predicament, and he is in a high predicament.

Against this dwindling strength, he is pitted the very best of the forces superior in air and commanding equipment and manning at least a million men, exclusive of China.

738 Hun Planes Shot Down Over British Isles

LONDON, Jan. 4.—(CP)—Royal Air Force fighter command pilots, including R.G.A.F. squadrons, and anti-aircraft fire destroyed 738 enemy planes over the British Isles and the continent during 1942, it was announced yesterday.

The air ministry news service

years the fighter command maintained the balance of losses in the West, but the bulk of its actions were over enemy-held territory. It lost 593 planes, but the pilots of 49 of the machines were saved and many others bailed out and are believed to be prisoners.

GERMAN LOSSES

German losses, equivalent to 62 squadrons, included 443 planes shot down over enemy's side of the channel, the report said. Over England, 118 enemy planes were shot down during daylight hours and 177 during night raids.

The latest figures brought to 10,573 the number of enemy aircraft destroyed in Europe and the Middle East since the war started.

Scores for the Far Eastern operations and by American forces were

Discussing operations in Europe, the German general said that the enemy's air casualties were slightly less in 1942 than in 1931 despite the increased weight of the Luftwaffe's offensive because "The Germans" showed "increased reluctance to engage our formations unless holding tactical or numerical superiority" and because "the enemy's air activity was concentrated on ground targets."

"The Luftwaffe's shyness in battle helped our daylight bombers to penetrate deeper into enemy territory than in the past," he said in the report said. "Flak Batteries and other heavily armed bombers frequently operated beyond the range of our fighters."

DIEPPE HIGHLIGHT

Highlighting the year for the fighter command was the aerial Battle of Dieppe in August, waged simultaneously with the Canadian

The Germans were forced to fight and lost 93 aircraft for certain with many more than 100 others probably destroyed and damaged. The U.S. fighters held command of the air over Dieppe and the channel from dawn to dusk on Aug. 19.

Fighter Command plans to fly on daylight hours in providing protection for convoys, the report adds. "The effectiveness of this cover was proved by the fact that a big increase in the number of ships was seen to go on over the channel in the early part of the war showed no corresponding increase in shipping losses."

More and Bigger Attacks Coming

Italy To Be Target of Heavier Allied Aerial Blows

Double trouble would appear to lie ahead for instructors of the WAVES who try to tell these recruits apart. They are 21-year-old twins Ann Louise and Jule Louise Bubnick, of Carteret, N.J., pictured after being sworn into the women's auxiliary of the U.S. navy.

Gunny Sack Gunner

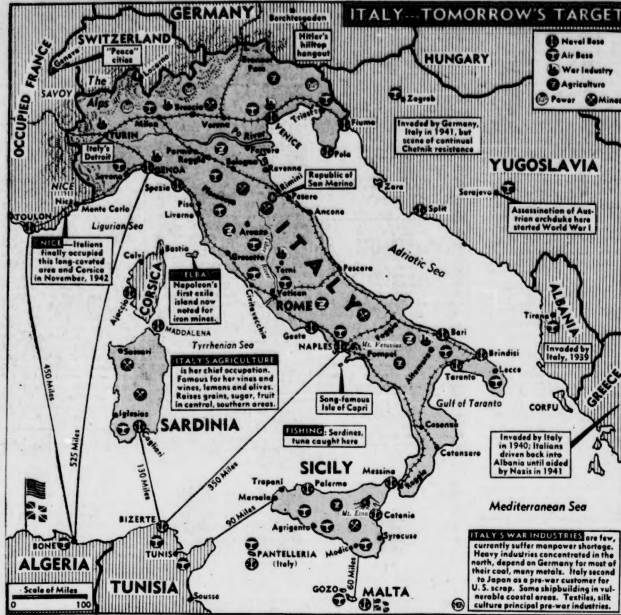

Odd as a creature from Oz is this British Home Guard soldier, effectively camouflaged in burriap bagging.

Oh, Boy, Girls

These American nurses, among the first to arrive in the Middle East, are given a royal welcome by a British officer and a newspaperman, who looks as though he might be interested in obtaining some desert phone numbers.

From top to toe boot-shaped Italy is destined to be a target for British and American bombers when the allies culminate their action in north Africa with a campaign to knock this axis partner out of the war. Current RAF raids on Turin, Genoa and Milan—Italy's heavy industry triangle—may be prelude to even bigger bombings of bases and industrial areas shown on map.

R.A.F. Bombers Blast Enemy-Held Radio Factory

One hundred R.A.F. bombers blasted the Philips radio tube works at Eindhoven, Holland, early this month. Great columns of white smoke drift from the giant plant, target of a concentrated attack by both incendiary and high explosive bombs. This is an official British photo taken while the raid was in progress.

Nice Work—and They Got It

Employees—not officials—of the Jack and Heintz Co., Cleveland, O., war plant, relax on the beach at Fort Lauderdale, Fla., where they are guests of William F. (Bill) Jack, "the best boss in the world." Jack is paying all their expenses and plans to give 140 of his workers similar vacations. He believes his plant "should do as good a job for the workers as they have done in production."

Savages

One of every eight workers in Britain's heavy iron and steel industry is a woman. Picture shows Mrs. J. Dobson, wearing hood (left), enjoying a rest period with Mrs. J. Fein, PCOPY.

Isn't It Inviting?

Explanation of those crowds at Sunset and Vine may be film starlet Frances Gifford's new contribution to the share-your-car campaign. But a lot of Hollywood men must be ending up a long way from work.

Virginia Christine was born in Stanton, Iowa, on March 5, 1920. Her parents were concert singers who for fifteen years had toured the country in Chautauque troupes. She was taking the dramatic course in Los Angeles College and had become president of the Opera Club, when at one of their affairs, she met the guest of honor, Fritz Feld, film character actor. It was a case of love at first sight and after their marriage she continued her studies at the University of California. During a Michael Mark Workshop production of Ismen's "Hedda Gabler" with Virginia in the title role a Warner talent scout offered her the test which led to the long term contract. A natural blonde, Virginia is five feet four inches in height, and weighs one hundred and fifteen pounds.

Two of Britain's Steel Workers
